

Tielogic S.r.l.

Horus V3 System Requirements

CPU: Intel i7 Quad-Core (> 3GHz)

RAM: 8 GB DDR4 (min.)

HDD: 256 GB SSD (or more depending on the type/number of projects)

GPU: GTX1050

VDU: 1920x1080 (min.)

OS: MS Windows 10 Pro 64 Bit

If you have an ethernet camera, you need a dedicated LAN port.

Security Requirements:

The licensed version of Horus does not need to be connected to LAN / Internet.

If the machine in which the software is installed is connected to some kind of network, it is the user's responsibility to take all safety measures.
